

PCI and What Not to Store

- Under no circumstances may a UT merchant store this information after the initial transaction has been approved:
 - Full PAN (primary account number)
 - Only the last four digits may be stored;
 - The remainder of the number must be masked.
 - Card Security Code (the three-digit code on the back of the card)
 - Data from the magnetic stripe
- Should you think you have a need to store this data, or have been storing this data, contact the Treasurer's Office and UTSA ISO immediately.
